

Brand Guidelines

Visual identity, color, typography and document standards for Neft Energies Training Institute – an oil & gas technical training institute.

Precision engineering knowledge, delivered with authority – for the people who run the region's energy infrastructure.

Technical Authority

Every material reflects field-tested engineering rigor, not generic corporate polish.

Regional Trust

Bilingual by default, built for MENA operators, regulators and contracting bodies.

Forward Energy

The gradient in our mark signals a business moving from legacy oil & gas toward diversified energy.

Clearspace

Keep clearspace equal to the height of the gear icon on all sides. No text, rule lines or imagery may enter this zone.

Minimum Size

Digital: 120px wide. Print: 25mm wide. Below this the pixel-dispersion detail in the "E" is lost – switch to the icon mark alone.

Backgrounds

Full-color mark on white or light neutrals. All-white (knockout) version on Navy #001A45 or photography. Never place on gold or mid-tone backgrounds.

02 – LOGO · COLOR VARIANTS

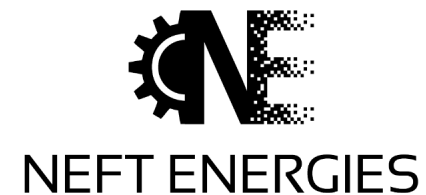

Full Color – Primary

Default mark. Use on white and light neutral backgrounds.

All-White – Knockout

For Navy, dark, or photographic backgrounds.

Single-Color – Black / Navy

For black-and-white printing, faxes, stamps, and engraving.

Four approved files are supplied: **neft-logo** (full color), **neft-logo-white** (knockout), **neft-logo-black** (mono black) and **neft-logo-navy** (mono navy). Never re-tint the mark outside these four; when only one ink is available, use black or navy – never gold.

02 – LOGO · MISUSE

✗ Don't stretch or distort

✗ Don't recolor the mark

✗ Don't place on busy/gradient art

✗ Don't add shadows or containers

03 – COLOR PALETTE

Navy – Primary

#001A45 · RGB 0,26,69

Gold – Primary Accent

#F5A623 · RGB 245,166,35

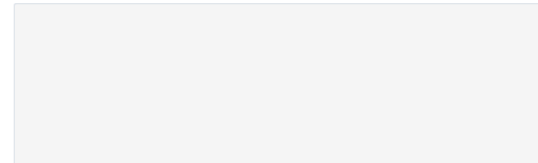

Teal – Secondary

#0E6472

Green – Tertiary

#8DC63F

Fog – Background

#F6F7F9

#5B6472

Navy carries all primary surfaces and headline text. Gold is reserved for single accents – CTAs, section markers, key figures. Teal and green appear only in data visualization or as gradient echoes of the mark; never as large flat fills.

ONE FAMILY – LATIN & ARABIC

Tajawal

Weights: 300 Light · 400 Regular · 500 Medium · 700 Bold · 800 ExtraBold · 900 Black

USAGE

Headings 700-900. Body & UI 400-500.

A single, unified typeface across every Neft document and presentation – no secondary Latin or Arabic face. Consistent voice, one file to install.

Aa

Display · 64-96px

Aa

Heading · 32-48px

Aa

Body · 22-28px

Aa

Caption · 16-20px

04 – TYPOGRAPHY · ARABIC (TAJAWAL)

Tajawal – one family, both scripts

Tajawal carries Arabic and Latin in a single family, so bilingual documents pair Arabic and English at matching optical size with no second typeface.

Set Arabic body copy 1-2px larger than its Latin counterpart for equal perceived weight. Always right-align Arabic blocks; never justify.

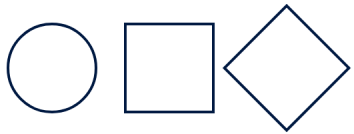

HEADINGS & BODY

نفت للطاقة

شركة نفط للطاقة للتدريب الفني في قطاع النفط والغاز

Iconography

Simple, single-weight line icons at 2px stroke, navy or white only. No filled icon sets, no emoji, no gradients on icons. Reserve gold fills for numerals and status markers only.

Photography

Real facility, plant, refinery, and classroom photography – never stock-generic. Cool color grade, navy shadows. Until real photography is sourced, use labeled placeholder frames rather than illustration.

[facility / plant photograph]

Every Neft Energies Training Institute template inherits this palette, type scale, and header/footer system.
